

2016 Bachelor of Health Science (Myotherapy)

Hands on
career in health

Meridian mə'ridēən *Noun*

A system of lines or circles that connect various points as channels through which energy flows. A point or period of highest development, greatest prosperity, or the like.

The meridian circles and lines associated with the Endeavour College of Natural Health symbolise the philosophy of holistic health care upon which the College was founded. Meridian lines continually intersect at various key points reflecting the strong connection between mind, body and spirit that graduates of the College strive to create for their patients to achieve balance and optimal health. The meridian line's ability to capture the point of highest development embodies the College's commitment to producing graduates of the highest quality and instilling the values of lifelong learning.

Myotherapy is a branch of manual medicine that focuses on the treatment and management of musculoskeletal pain and dysfunction. Myotherapy involves an extensive physical evaluation and an integrated therapeutic approach in the treatment of affected muscles, joints and nerves. It uses standard methods of assessment such as postural evaluation and neurological and functional testing to determine the particular cause of musculoskeletal pain and associated dysfunction.

Course Duration

3 years full time: 24 contact hours per week
6 years part time: 12 contact hours per week

Study Mode

Face-to-face on campus with selected subjects available online. See the course structure opposite for online availability.

Online Learning

Subjects that may be taken online are shown in the course structure opposite. For a current listing of online subject availability and intake dates visit endeavour.edu.au/online-learning/subjects-available-online.

Semester Intakes

February and August annually.

Entry Requirements

Endeavour College is a direct entry institution.

- Year 12 or equivalent (OP/ATAR score not required)
- Mature age students without year 12 equivalent may be admitted based on relevant educational history
- English language proficiency equivalent to a 7.0 IELTS result is required.

Transfer Credit

Students may apply for credit for subjects recently studied in formal education.

Recognition of Prior Learning (RPL)

Students may apply for RPL based on relevant work experience and educational history.

Payment Options

- FEE-HELP approved
- Payment plan or upfront payment

Tuition payment arrangements must be confirmed upon admission to the College.

Classes

Classes are taught by experts who are highly trained in their fields and who bring their own clinical experience to help provide context to therapeutic subjects.

Practical Classes

As a primary mode of learning in this course, students attend practical classes where they are expected to practice examination and treatment procedures on each other under the supervision of qualified instructors. This is conducted with respect for privacy, cultural and religious differences.

Teaching Clinics

Students gain significant clinical experience at Endeavour's Teaching Clinics under the supervision of qualified practitioners. Our busy clinics provide the opportunity to develop and hone clinical skills in patient assessment and management.

Assessments

While some subjects require mid-term and final exams, assessments may also comprise quizzes, essays and tutorial participation. Students enrolled in an online subject sit their final exam at the College or, if they live at a distance, under approved external supervision.

Professional Recognition

Graduates may apply for membership with the following associations:

- Australian Association of Massage Therapists (AAMT)
- Australian Natural Therapists Association (ANTA)
- Australian Traditional Medicine Society (ATMS)
- Institute of Registered Myotherapists of Australia (IRMA)

Online Learning

Professional associations vary as to the amount of online learning that they accept in a Bachelor degree. Their standards may change at any time and although Endeavour commits to keeping students informed of such changes, ultimately it is the student's responsibility to keep abreast of these issues to ensure they meet the qualifications.

Career Opportunities

Myotherapists may practice independently as a sole trader, or provide treatment in conjunction with other health-care professionals in a multidisciplinary setting. Myotherapists commonly work alongside other allied health practitioners such as medical practitioners, physiotherapists, osteopaths, chiropractors, acupuncturists and naturopaths.

Practitioners may choose to focus on particular areas of interest with specialised groups such as pre and postnatal care, dancers, gymnasts, circus arts, athletes and sporting teams, golfers and musicians, or areas such as palliative and aged-care.

Graduates of the Myotherapy degree are recognised by the Health Professionals and Support Services Award (2010). This provides any potential employer such as a hospital, nursing home or rehabilitation facility with official guidelines regarding salaries and conditions of employment.

Graduates may be eligible to apply for a variety of transitional Master's programs in areas such as physiotherapy, occupational therapy, rehabilitation and other health related areas.

For more information on this area of study explore online at endeavour.edu.au or call **1300 462 887** to speak with an Admissions Adviser.

Subject Descriptions

Bachelor of Health Science (Myotherapy) BHSc (Myo)

Code	Subject Title	Description
Semester 1		
BIOH111	Human Biological Science 1	Introduces concepts of human anatomy, physiology, homeostasis and the systems of control, growth, development, replacement, structure, and movement.
BIOB111	Chemistry and Biochemistry	Introduces concepts of general, physical and organic chemistry in order to understand the chemical workings of the body at cellular, tissue and systemic level.
SOCH111	History of Healing	History and philosophy of health paradigms from early human existence to present day. Current public health is explored.
SOCF111	Foundations of Communication and Counselling	Introduces communication, counselling and interpersonal skills for a natural medicine practitioner.
MSTA121	Musculoskeletal Anatomy and Palpation 1	This subject develops a practical and theoretical framework for the development of client assessment skills such as palpation. Students learn to identify and palpate bony landmarks, muscles and other relevant structures.
Semester 2		
BIOH122	Human Biological Science 2	Provides further understanding of maintenance of homeostasis and explores systems of transport, protection, nutrition, storage and elimination.
MSTF121	Foundations of Myotherapy Practice	Establishes the foundations for the theory, practice and principles of myotherapy. Students develop a variety of techniques such as seated massage, full-body Swedish massage and lymphatic drainage.
MSTC121	Myotherapy Clinical Skills	Builds an understanding of the essential elements of clinical practice. Work health and safety, ethical practice, record keeping and clinic management are covered. This unit prepares students for MSTC212 in which they apply their knowledge and skill to the management of clients in the WellNation clinic.
MSTN121	Neurophysiology	This subject expands on the knowledge of the nervous system developed in BIOH111 and introduces neurological testing. Students begin to investigate the links between the nervous system and pain and dysfunction of the musculoskeletal system.
MSTA212	Musculoskeletal Anatomy and Palpation 2	Building on the knowledge and skill developed in MST121, students learn to identify and palpate deeper and more challenging muscles, joints, ligaments and tendons. An essential companion to their learning, students visit an off-site University cadaver lab to investigate human anatomy specimens.
SOCC121	Foundations of Critical Enquiry	Learn to critically evaluate relevant literature, understand a variety of research methodologies, statistical techniques, and importance of research ethics.
Semester 3		
BIOC211	Pathology and Clinical Science 1	Introduces concepts of body responses to injury, general pathological processes, symptomatology & diagnostic testing. Explores diseases of cardiovascular, respiratory, digestive & urinary systems.
NMDF121	Foundations of Human Nutrition	Establishes the essential bridge between bioscience and nutrition science. Students explore the biological and physiological functions of macro and micro nutrients.
MSTC212	Myotherapy Clinical Practicum 1	This is the myotherapy student's first experience of clinical practice. Students have the opportunity to apply their current knowledge and skills to the treatment and management of clients in a supervised clinic setting by providing basic therapeutic and relaxation massage.
MSTR211	Myofascial Release	In this subject, students are introduced to the principles and practice of basic myofascial release, including cupping and muscle energy techniques.
MSTT211	Myotherapy for the Lower Body 1	Through focus on the lower half of the body, students study movement, additional assessment tools and soft tissue therapeutics. Students learn postural assessment, range of movement testing, gait analysis and neuromuscular techniques.
MSTT212	Myotherapy for the Upper Body 1	Focusing on the upper body, this subject develops a more thorough assessment procedure, incorporating range of movement and postural assessments. Students deepen their knowledge and understanding of movement and use neuromuscular techniques to address soft tissue dysfunction.
Semester 4		
BIOE222	Pathology and Clinical Science 2 & 3	Explores the pathological processes and medical management of ENT and ocular diseases, & diseases of lymphatic, haematological, integumentary & musculoskeletal systems.
BIOE221	Clinical Examination	Develop knowledge and skills to perform clinical assessment & examination from a Western medical perspective to assist in client diagnosis and management.
MSTC223	Myotherapy Clinical Practicum 2	In this clinical practice subject, students are required to demonstrate their ability to integrate and apply their existing musculoskeletal knowledge and skills in a supervised clinical setting. Students conduct an assessment of clients with soft tissue dysfunctions and develop a treatment plan to specifically address client's individual needs.
MSTS221	Sports Injury Management	Students consolidate and build upon their existing knowledge of myotherapy through an introduction to the management of sports related injuries.
MSTT223	Myotherapy for the Lower Body 2	This subject furthers students' knowledge and skills in assessment and soft tissue techniques. Orthopaedic testing and a basic neurological assessment are developed and applied to the management of musculoskeletal dysfunction.
MSTT224	Myotherapy for the Upper Body 2	Students learn further methods of orthopaedic assessment, develop a basic neurological assessment and broaden therapeutic techniques to better address soft tissue dysfunction in the upper body.
Semester 5		
NMDS311	Sports Nutrition	Introduces students to the specific nutritional requirements for athletes with emphasis placed on the practical application of sports nutrition guidelines and practices.
MSTC314	Myotherapy Clinical Practicum 3	This unit of study provides students with an opportunity to further consolidate their expertise and confidence in the application of integrated myotherapy theory and practice to client care in a supervised clinic setting.
MSTM311	Myofascial Dry Needling 1	Students are introduced to the principles and technique of myofascial dry needling and its application as an adjunctive therapy in the treatment of myofascial trigger points and chronic pain syndromes.
MSTT315	Myotherapy for the Axial Skeleton	Students extend their understanding of myotherapy by gaining a thorough knowledge of segmental joint mobility assessment and segmental mobilizations of the axial skeleton.
MSTT316	Myotherapy for the Appendicular Skeleton	In this subject, students build upon their myotherapy knowledge through the study of segmental joint mobility assessment and segmental mobilizations of the appendicular skeleton.
MSTE311	Exercise Therapy and Rehabilitation	Students learn about rehabilitation principles and practice, and begin to develop rehabilitation plans to improve client strength, movement and function.
Semester 6		
SOCE311	Establish and Manage a Practice	Develop skills to establish a health practice and manage/operate the clinic. Business strategies, ethics, privacy and relevant legislative requirements.
MSTC325A	Myotherapy Clinical Practicum 4A	In these supervised clinic subjects, students are required to demonstrate their ability to appropriately apply theoretical knowledge and practical therapeutic and assessment skills gained throughout the course.
MSTC325B	Myotherapy Clinical Practicum 4B	In these supervised clinic subjects, students are required to demonstrate their ability to appropriately apply theoretical knowledge and practical therapeutic and assessment skills gained throughout the course.
MSTM322	Myofascial Dry Needling 2	Students will develop their knowledge of myofascial dry needling technique and gain a deeper understanding of its application to the management of soft tissue dysfunction. TENS and electro-needling techniques are introduced.
MSTS323	Advanced Sports Injury Management	Students will further their study of the myotherapy management of sports-related injuries through the integration and application of assessment and treatment methods gained throughout the course.
MSTT327	Integrated Myotherapy Techniques	In this subject, students integrate and consolidate assessment and practical skills gained throughout the course to date, with a focus on development of clinical reasoning.

Endeavour College reserves the right to vary the frequency, availability and scheduling of online subject offerings depending on demand and professional body requirements. Students should gain advice from relevant professional bodies as to the acceptable amount of online learning that may be undertaken to obtain association recognition. Policies and procedures relating to study with the College, including the Course Viability Policy, are available online at www.endeavour.edu.au/policies-and-procedures.
