

SUBJECT OUTLINE

Subject Name:

Clinical Examination

Subject Code:

BIOE221

SECTION 1 - GENERAL INFORMATION

Award/s:	Total Course Credit Points:	Level:
Bachelor of Health Science (Acupuncture)	128	3 rd Year
Bachelor of Health Science (Naturopathy)	128	3 rd Year
Bachelor of Health Science (Nutritional and Dietetic Medicine)	96	2 nd Year
Bachelor of Health Science (Myotherapy)	96	2 nd Year
Duration:	1 Semester	
Subject Coordinator:	Mark Payne (Melbourne campus)	
Subject is:	Subject Credit Points:	2
Core		

Student Workload:

No. timetabled hours per week:	No. personal study hours per week:	Total hours per week:
3	2	5

Delivery Mode:

Face to Face 1 x 1 hour lecture 1 x 2 hour practical
(On campus)

Intensive Delivery Contact hours are delivered over 5 weeks with 2 x 4 hour days delivered per week
(Summer School)

Content: Combination lecture and practical activities

Assessment: Continuous Skill Development - Weeks 1-5; Practical Exam 1 - Week 2; Practical Exam 2 - Week 3; Practical Exam 3 - Week 6; Clinical Approach Assignment - Week 6

Full Time

Part Time

Pre-requisites: BIOH122

Co-requisites: BIOC211

Special Resource Requirements:

Bath-sheet sized towel per student (Clinic towels must not be used)

Kit items include:

- Measuring tape
- Otoscope
- Pen torch
- Percussion reflex hammer
- Sphygmomanometer
- Stethoscope
- Thermometer

SECTION 2 – ACADEMIC DETAILS

Subject Rationale

This subject teaches students the theory and practical skills for clinical examination and assessment of the client using conventional medical diagnostic techniques with common examination tools. These skills are essential to the clinical competence of health professionals regardless of discipline. Students are required to practice examination procedures on each other in a supervised setting, learning appropriate regard for privacy and personal boundaries as well as appropriate Work, Health and Safety practices. The subject supports students to develop their interpersonal and communication skills for the clinical setting and consolidates all previous bioscience learning.

Learning Outcomes

1. Identify different physical examination techniques used for gathering clinical information as well as for monitoring progress.
2. Accurately perform a variety of physical examination techniques including use of appropriate equipment.
3. Interpret results of history taking, physical and mental state examination and investigations and identify correct physical examination technique for diagnosis.
4. Apply general principles and specific knowledge of clinical examination techniques to a variety of clinical situations.

Assessment Tasks

Type	Learning Outcomes Assessed	Session Content Delivered	Due	Weighting
Continuous Skill Development (attendance at 8 of 10 teaching sessions and active participation required)	1-4	1-4, 6-7, 9-13	Sessions 1-7, 9-13	Pass/Fail
Practical Exam 1	2-4	1-4	Session 6	20%
Practical Exam 2	2-4	5 & 7	Session 9	20%
Practical Exam 3	2-4	10-12	Session 14	20%
Clinical Approach Assignment (1500 words)	1, 3 & 4	1-13	Week 15	40%

All written assessments and online quizzes are due at 11:55 p.m. and submitted through the LMS

The overall passing mark for this subject is 50%.

Attempt at all practical exams is required

Subject Content		
Week	Lectures	Practicals
1.	The Interview and Health History; Assessment techniques and the ethical approach to the clinical examination <ul style="list-style-type: none"> • General examination • Measurement • Weight and height Demonstration of appropriate techniques <ul style="list-style-type: none"> • Inspection and palpation 	Supervised practice of demonstrated techniques <ul style="list-style-type: none"> • Anthropometrics • General examination
2.	Vital Signs <ul style="list-style-type: none"> • Temperature • Pulses • Respirations • Blood Pressure lying and standing 	Supervised practice of demonstrated techniques <ul style="list-style-type: none"> • Temperature • Pulses • Respirations • Blood pressure
3.	Vital Signs & Peripheries <ul style="list-style-type: none"> • Skin, hair and nails capillary refill • Peripheral vascular system mobility, turgor and oedema Demonstration of appropriate techniques <ul style="list-style-type: none"> • Inspection palpation and auscultation 	Supervised practice of demonstrated techniques and ongoing testing of prior material <ul style="list-style-type: none"> • Blood pressure lying and standing • Examination of skin, hair, nails, capillary refill peripheral vascular system mobility, turgor and oedema
4.	Examination of the Head and Neck <ul style="list-style-type: none"> • Eyes • Mouth, throat, thyroid, lymph nodes and ears Demonstration of appropriate techniques <ul style="list-style-type: none"> • Inspection, palpation, and auscultation 	Supervised student practice of demonstrated techniques <ul style="list-style-type: none"> • Eye examination – external • Examination of the head and neck including mouth, throat, thyroid, lymph nodes and ears
5.	Thoracic Examinations Lower respiratory tract – lungs and bronchi <ul style="list-style-type: none"> • Respiratory examination Demonstration of appropriate techniques <ul style="list-style-type: none"> • Inspection palpation, percussion and auscultation 	Supervised student practice of demonstrated techniques <ul style="list-style-type: none"> • Respiratory examination
6.	Practical Exam 1 <ul style="list-style-type: none"> • Vital signs, all pulses, peripheries and skin • Head and neck 	

7.	The Abdomen Examination Demonstration of appropriate techniques <ul style="list-style-type: none"> • Inspection • Palpation • Percussion • Auscultation 	Supervised practice of demonstrated techniques
NON-TEACHING WEEK (note that make-up classes may be scheduled in this week) Semester 1 - This aligns with the week after Easter so it may fall between Weeks 6 to 8 Semester 2 - The non-teaching week falls between Weeks 7 and 8		
8.	Workshop: The clinical approach through case studies <ul style="list-style-type: none"> • Common symptomology • Developing differential diagnosis Selecting examination techniques	
9.	Practical Exam 2 <ul style="list-style-type: none"> • Abdominal examination • Thoracic examination 	
10.	Neurological Examination – Part 1 Demonstration of appropriate techniques: <ul style="list-style-type: none"> • Inspection, palpation and special tests • Cranial nerve tests 	Supervised practice of demonstrated techniques and ongoing testing of prior material <ul style="list-style-type: none"> • Neurological assessment • Case studies
11.	Neurological Examination – Part 2 Demonstration of appropriate techniques: <ul style="list-style-type: none"> • Reflex testing 	Supervised practice of demonstrated techniques <ul style="list-style-type: none"> • Reflex assessment
12.	Musculoskeletal Examinations Demonstration of appropriate techniques <ul style="list-style-type: none"> • Inspection • Palpation • Range of motion • Muscle testing 	Supervised practice of demonstrated techniques <ul style="list-style-type: none"> • Musculoskeletal examinations
13.	Clinical Examination in Practice: Putting it all together Use of case studies to critical analyse and identify the most appropriate examinations <ul style="list-style-type: none"> • The Primary system(s) and relevant examinations to be performed • The Secondary system(s) and relevant examinations to be performed Supervised student practice for a case study and the performance of the relevant clinical examinations	
14.	Practical Exam 3 <ul style="list-style-type: none"> • Neurological examination • Musculoskeletal examination 	
15.	Non-Teaching Week/Practical Examination Week Note that make-up classes may be scheduled in this week Clinical Approach Assignment is due this week	
16.	Final Examination Week 1 There is no final exam for this subject	
17.	Final Examination Week 2 There is no final exam for this subject
