SECTION 2 – ACADEMIC DETAILS

Subject Rationale

Through the course of this subject the student increases their knowledge and skill in applying the twenty four key Tui na techniques and one compound Tui na technique by developing a range of practical prescriptions to manage a range of Chinese medicine conditions. Conditions covered in this subject include musculoskeletal, internal medicine and gynaecological disorders. By subject conclusion the student will be capable of developing an informed argument for the utilisation of key Tui na techniques as part of an acupuncture treatment.

Learning Outcomes

1. Integrate and explain how Chinese medicine theory and principles intersect with Tui na specific theories and principles in the management of defined conditions.
2. Discuss and explain all cautions and contraindications associated with the practice of specific Tui na techniques when applied within the management of specific conditions.
3. Identify, define and consistently apply the twenty-four core Tui na techniques and one compound Tui na technique as appropriate within the management of each condition.
4. Define, interpret and continuously demonstrate appropriate work, health and safety within all practical sessions.
5. Define, interpret and continuously demonstrate cultural sensitivity and ethical considerations within all theoretical and practical sessions.
