

SUBJECT OUTLINE

Subject Name:

Clinical Nutritional Medicine

Subject Code:

NMDC221

SECTION 1 - GENERAL INFORMATION

Award/s:	Total Course Credit Points:	Level:
Bachelor of Health Science (Naturopathy)	128	3 rd Year
Bachelor of Health Science (Nutritional and Dietetic Medicine)	96	2 nd Year
Bachelor of Health Science (Nutritional Medicine)	96	2 nd Year
Duration:		
1 Semester		
Subject Coordinator:		
Kristan Gilbert (Melbourne campus)		
Subject is:	Subject Credit Points:	
Core	6	

Student Workload:

No. timetabled hours per week:	No. personal study hours per week:	Total hours per week:
9	6	15

Delivery Mode:

Face to Face 3 x 3 hour lectures
(On campus)

Full Time

Part Time

Pre-requisites: NMDM121, BIOC211, NMDF211

Co-requisites: BIOS222 (pre- or co-)

SECTION 2 – ACADEMIC DETAILS

Subject Rationale

This subject integrates and consolidates knowledge gained from previous health science and nutritional and dietetic medicine subjects through an exploration of the nutritional management of various health conditions and individual cases. Students learn treatment strategies that incorporate dietary modification and nutritional management and learn to critically evaluate these from the perspectives of traditional empirical knowledge and evidence-based research. Potential drug-herb-nutrient interactions are critically discussed. Clinical Nutritional Medicine is an essential foundation for clinical practice.

Learning Outcomes

1. Apply professional judgement in interpreting clinical symptoms and signs, clinical examinations, and pathology testing in assessment of nutritional status and management of complex pathologies.
2. Analyse and evaluate current research to determine nutritional medicine treatments appropriate for the management of different population groups and a variety of health conditions.
3. Determine appropriate therapeutic goals and strategies for the dietary and nutritional management of clients with complex pathologies.
4. Analyse and evaluate the evidence for potential drug-herb-nutrient interactions in the treatment of individual cases.
5. Discuss the advantages and limitations of nutrition and diet therapy in the management of common health conditions and individual case examples.

Assessment Tasks				
Type	Learning Outcomes Assessed	Session Content Delivered	Due	Weighting
3 Concept Maps 3 x A4 single-sided	1, 3-4	1-12	Week 4	30% (3 x 10%)
Case Study Analysis 1 (1500 words)	1-5	14-21	Week 8	35%
Case Study Analysis 2 (1500 words)	1-5	22-33	Week 12	35%
All written assessments and online quizzes are due at 11:55 p.m. and submitted through the LMS

Subject Content	
Week	Lectures
1.	Session 1 Introduction (Subject Outline / Subject Aims / Assessment / Teaching Resources) Gastrointestinal and Alimentary Disease: Part 1 <ul style="list-style-type: none"> Introduction to clinical decision making Revision basic pharmacology / drug schedules, history / adverse reactions Overview of principles and considerations in nutritional management of the GIT disorders Nutritional management of gastro-oesophageal reflux disease Review mechanisms of nutrient-drug interactions and discuss relevant interactions

	<p>Session 2</p> <p>Gastrointestinal and Alimentary Disease: Part 2</p> <ul style="list-style-type: none"> • Introduction to the importance of communication with concurrent healthcare professionals (e.g. medical practitioners) and the elements of a referral letter • Discussion on the importance of reporting interactions to relevant bodies • Nutritional management of hypochlorhydria, gastritis, peptic ulcers / helicobacter pylori, constipation, diarrhoea and haemorrhoids • Relevant nutrient-drug interactions
	<p>Session 3</p> <p>Gastrointestinal and Alimentary Disease: Part 3</p> <ul style="list-style-type: none"> • Nutritional management of gut dysbiosis, irritable bowel syndrome, cholecystitis, cholelithiasis and pancreatitis • Therapeutic diets: FODMAP, Lactose-free diet • Relevant nutrient-drug interactions
2.	<p>Session 4</p> <p>Gastrointestinal and Alimentary Disease: Part 4</p> <ul style="list-style-type: none"> • Nutritional management of complex GIT disorders; inflammatory bowel disease and coeliac disease • Therapeutic diets: soft diet, gluten free diet, dairy free diet • Relevant nutrient-drug interactions
	<p>Session 5</p> <p>Hepatic Disease</p> <ul style="list-style-type: none"> • Nutritional management of liver detoxification pathways, alcoholic liver disease, steatosis, hepatitis A, B, C • Nutritional support and modulation of hepatological disorders • Therapeutic diet: reduced-fat diet • Relevant nutrient-drug interactions
	<p>Session 6</p> <p>Immune System Disease: Part 1</p> <ul style="list-style-type: none"> • Introduction - overview of principles and considerations in nutritional management of the immune system • Immunological basis of food allergy and intolerance • Nutritional management of food allergies and intolerances • Therapeutic diets: Elimination diet, low reactive diet • Relevant nutrient-drug interactions
3.	<p>Session 7</p> <p>Immune System Disease: Part 2</p> <ul style="list-style-type: none"> • Nutritional management of varicella zoster, herpes simplex 1 & 2, herpes zoster, ringworm, tinea, warts and cellulitis • Relevant nutrient-drug interactions
	<p>Session 8</p> <p>Immune System Disease: Part 3</p> <ul style="list-style-type: none"> • Nutritional management and support of measles, mumps and rubella, acute food poisoning with vomiting & diarrhoea, parasitic causes of acute diarrhoea and chronic diarrhoea, candidiasis and mononucleosis • Relevant nutrient-drug interactions
	<p>Session 9</p> <p>Autoimmune Disease</p> <ul style="list-style-type: none"> • Nutritional support and modulation of autoimmune conditions • Therapeutic diet: anti-inflammatory diet • Relevant nutrient-drug interactions

4.	Session 10 HIV/AIDS <ul style="list-style-type: none"> Nutritional management of HIV and AIDS Nutritional support and modulation of quality of life (QoL) Adjunctive support for individuals on HAART and treatment side effects Relevant nutrient-drug interactions
	Session 11 Respiratory System Disease: Part 1 <ul style="list-style-type: none"> Review anatomy and physiology of the respiratory system Overview of principles and considerations in nutritional management of the respiratory system Nutritional management for smoking cessation
	Session 12 Respiratory System Disease: Part 2 <ul style="list-style-type: none"> Nutritional management of colds, flu, sinusitis, tonsillitis, allergic rhinitis and asthma Relevant nutrient-drug interactions
5.	Session 13 Respiratory System Disease: Part 3 <ul style="list-style-type: none"> Nutritional management of acute bronchitis, chronic obstructive airways disease (COAD), emphysema, bronchiectasis and pneumonia Relevant nutrient-drug interactions
	Session 14 Nervous System Disease: Part 1 <ul style="list-style-type: none"> Review the biochemical and physiological functions of the nervous system Overview principles and considerations in nutritional management of nervous system conditions Nutritional and holistic approaches to pain management Relevant nutrient-drug interactions
	Session 15 Nervous System Disease: Part 2 <ul style="list-style-type: none"> Nutritional management of anxiety disorders, sleep disorders, depression, bipolar disorder, and schizophrenia Relevant nutrient-drug interactions
6.	Session 16 Nervous System Disease: Part: 3 <ul style="list-style-type: none"> Nutritional management of epilepsy, myasthenia gravis and multiple sclerosis Nutritional support and modulation of these conditions Therapeutic diets: ketogenic diet, Swank diet Relevant nutrient-drug interactions
	Session 17 Nervous System Disease: Part 4 <ul style="list-style-type: none"> Nutritional management of dementia, Alzheimer's disease and Parkinson's disease Relevant nutrient-drug interactions
	Session 18 Fatigue States <ul style="list-style-type: none"> Nutritional management of chronic fatigue syndrome and fibromyalgia Nutritional support of these fatigue states drawing on relevant literature Relevant nutrient-drug interactions

7.	Session 19 Cardiovascular System Disease: Part 1 <ul style="list-style-type: none"> • Overview of principles and considerations in nutritional management of the cardiovascular system • Nutritional management of chilblains, Raynaud’s disease, varicose veins, varicose ulcers and hyperlipidaemia • Relevant nutrient-drug interactions
	Session 20 Cardiovascular System Disease: Part 2 <ul style="list-style-type: none"> • Nutritional strategies for primary prevention and the management of hypertension, atherosclerosis, heart disease (angina, myocardial infarction) and stroke • Therapeutic diets: Mediterranean diet • Relevant nutrient-drug interactions
	Session 21 Cardiovascular System Disease: Part 3 <ul style="list-style-type: none"> • Nutritional management of, anaemias, and haemochromatosis • Dietary considerations for cardiomyopathy and congestive heart failure • Nutritional support and modulation of these conditions drawing upon relevant literature • Relevant nutrient-drug interactions
NON-TEACHING WEEK (note that make-up classes may be scheduled in this week) Semester 1 - This aligns with the week after Easter so it may fall between Weeks 6 to 8 Semester 2 - The non-teaching week falls between Weeks 7 and 8	
8.	Session 22 Integumentary System Disease: Part 1 <ul style="list-style-type: none"> • Overview of principles and considerations in nutritional management of the integumentary system • Review the anatomy and physiology of the integumentary system • Nutritional management of eczema and dermatitis • Relevant nutrient-drug interactions
	Session 23 Integumentary System Disease: Part 2 <ul style="list-style-type: none"> • Nutritional management of psoriasis, acne vulgaris and acne rosacea • Relevant nutrient-drug interactions
	Session 24 Musculoskeletal System Disease: Part 1 <ul style="list-style-type: none"> • Overview of principles and considerations in nutritional management of the musculoskeletal system • Review the anatomy and physiology of the musculoskeletal system • Nutritional management of osteoarthritis, gout and osteoporosis • Relevant nutrient-drug interactions
9.	Session 25 Musculoskeletal System Disease: Part 2 <ul style="list-style-type: none"> • Management of complex and multi-system conditions through the use of specific nutritional medicines and their specific biochemical and physiological applications in the management of ankylosing spondylitis and rheumatoid arthritis • Focus on the nutritional support and modulation of these conditions drawing upon relevant literature • Discuss relevant drug interactions and potentiations through an understanding of mechanisms of action of interactions

	<p>Session 26</p> <p>Endocrine System Disease: Part 1</p> <ul style="list-style-type: none"> • Overview of principles and considerations in nutritional management of the endocrine system • Review the anatomy and physiology of the endocrine system • Nutritional management of hypothyroidism, Hashimoto's disease, hyperthyroidism and Grave's disease • Relevant nutrient-drug interactions
	<p>Session 27</p> <p>Endocrine System Disease: Part 2</p> <ul style="list-style-type: none"> • Nutritional management of adrenal exhaustion, Addison's disease and Cushing's syndrome • Relevant nutrient-drug interactions
10.	<p>Session 28</p> <p>Endocrine System Disease: Part 3</p> <ul style="list-style-type: none"> • Nutritional management of dysglycaemias, insulin dependent diabetes mellitus, non-insulin dependent diabetes mellitus, metabolic syndrome and healthy blood glucose regulation • Nutritional support to reduce the risk of adverse health outcomes associated with dysglycaemias • Weight reduction strategies • Therapeutic diets; Low GI diet, Low GL diet • Relevant nutrient-drug interactions
	<p>Session 29</p> <p>Genitourinary and Renal System Disease</p> <ul style="list-style-type: none"> • Overview of principles and considerations in nutritional management of the genitourinary and renal system • Review the biochemical and physiological function of the genitourinary and renal system • Nutritional management of cystitis, interstitial cystitis, urethritis and renal calculi • Relevant nutrient-drug interactions
	<p>Session 30</p> <p>Male Reproductive System Disease</p> <ul style="list-style-type: none"> • Overview of principles and considerations in nutritional management of the male reproductive system • Review the anatomy and physiology of the male reproductive system • Nutritional management of acute and chronic bacterial prostatitis, non-bacterial prostatitis, epididymitis, benign prostatic hypertrophy, erectile dysfunction and male infertility • Relevant nutrient-drug interactions
11.	<p>Session 31</p> <p>Female Reproductive System Disease: Part 1</p> <ul style="list-style-type: none"> • Overview of principles and considerations in nutritional management of the female reproductive system • Review the anatomy and physiology of the female reproductive system • Nutritional management of pre-menstrual disorders: PMS-A, PMS-C, PMS-D, PMS-H, PMS-P • Relevant nutrient-drug interactions
	<p>Session 32</p> <p>Female Reproductive System Disease: Part 2</p> <ul style="list-style-type: none"> • Nutritional management of dysmenorrhoea, abnormal & dysfunctional uterine bleeding and polycystic ovarian syndrome (PCOS) • Relevant nutrient-drug interactions
	<p>Session 33</p> <p>Female Reproductive System Disease: Part 3</p> <ul style="list-style-type: none"> • Nutritional management of endometriosis and infertility • Relevant nutrient-drug interactions

12.	Session 34 Female Reproductive Health: Part 1 <ul style="list-style-type: none"> Nutritional management of pregnancy and preconception care Relevant nutrient-drug interactions
	Session 35 Female Reproductive Health: Part 2 <ul style="list-style-type: none"> Nutritional management of menopause Relevant nutrient-drug interactions
	Session 36 Cancer: Part 1 <ul style="list-style-type: none"> Overview of cancer aetiology and progression Nutritional approach to cancer prevention Therapeutic diet: Ornish lifestyle program, Vegan diet, juicing
13.	Session 37 Cancer: Part 2 <ul style="list-style-type: none"> Conventional treatment – nutrient considerations and potential nutrient interactions and contraindications Nutritional management post conventional treatment Nutritional approaches for improved quality of life and survival
	Session 38 Paediatric Conditions <ul style="list-style-type: none"> Nutritional management of otitis media, whooping cough, ADHD, and autistic spectrum disorders drawing upon relevant literature Relevant nutrient-drug interactions
	Session 39 Multi System Conditions <ul style="list-style-type: none"> Nutritional management for comorbidities – cardiac, neurological and immune Relevant nutrient-drug interactions
14.	Non-Teaching Week/Practical Examination Week 1 Note that make-up classes may be scheduled in this week
15.	Non-Teaching Week/Practical Examination Week 2 Note that make-up classes may be scheduled in this week
16.	Final Examination Week 1 There is no final exam for this subject
17.	Final Examination Week 2 There is no final exam for this subject
